

LASIK FAQs :

- **How long does the surgery take place ?**
Usually 10 to 15 min.
- **Is it painful?**
No, except mild pressure sensation for few minutes.
- **When can normal daily activities be resumed?**
You can resume your activities in 3-4 days time.
- **Is LASIK safe ?**
Lasik is one of the safest surgeries in human body, however as with any medical procedures there are certain risk involved which a candidate may understand and accept before surgery. Please make sure you have discussed your case in detail with your surgeon and understood all aspects of the procedure.

BENEFITS OF LASER SURGERY

Immediate Results

Improved vision within hours of the procedure
Freedom from corrective wear-
Patients enjoy their full visual potential and often even better quality & independence from glasses.

New Activities

Patients find travel becomes much more enjoyable and convenient, without having to pack extra glasses or all the necessary accessories for contacts. Furthermore, such activities as swimming, cycling etc. are more enjoyable.

More self confidence

Perhaps the most life changing of the many LASIK benefits is the heightened self-confidence many patients attain.
With all these combined benefits, patients feel like a whole new world has been opened to them.

Laser Vision Correction

Are Glasses and Contact lenses holding you back ?

Laser vision correction - LASIK might just be the answer for you to get - FREEDOM from glasses

NUMBER FACTS:

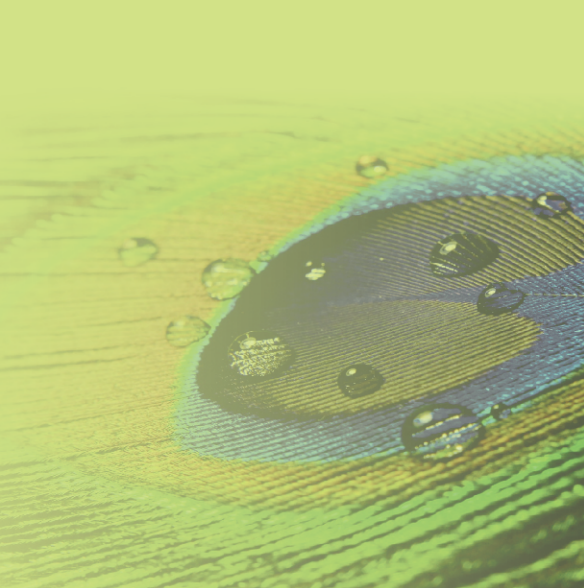

- >17 million people worldwide have had laser vision correction
- LASIK is the world's most widely performed procedure to offer spectacle free vision.

Your eyes are like fingerprints- they are as unique as you are.

Unique eyes deserve unique procedures.

OptiLASIK™ uses advanced, proprietary treatments to generate a map of each unique eye- enabling your surgeon to perform a personalized and effective procedure. Thus each treatment is a wavefront optimized treatment and therefore highly customized and patient specific.

The Eye SuperSpecialities selected the ALCON WAVELIGHT EX500 to ensure our patients have the most advanced technology available to provide the highest quality outcomes. It represents the state-of-the art in laser Eye surgery.

WaveLight EX500

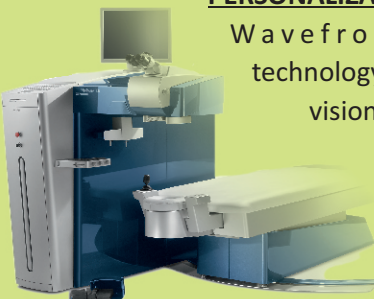

The WaveLight EX500 has unique advantages as a LASIK platform.

The World's Fastest Excimer Laser and the fastest Eye Tracker available, moving 10 times faster than the eye, ensures the best treatment outcome.

SPEED : Each "burst" of the Alcon EX 500 Laser lasts mere billionths of a second before the laser shifts to its next position-up to 100 times faster than some lasers.

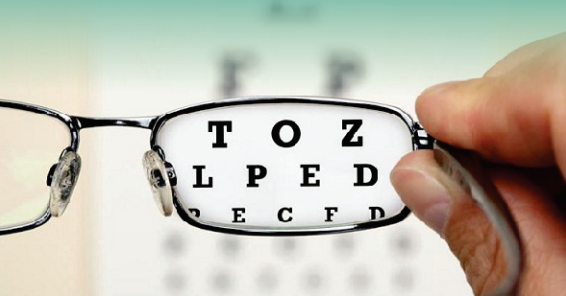

PRECISION : The Alcon EX 500 Laser uses a small-spot laser beam, which allows LASIK specialists to shape the cornea in finer, more gradual increments for a smoother surface with eye-tracking technology 8 times faster than some of the competition.

PERSONALIZATION : The advanced Wavefront Optimized® technology, creates a personal vision profile and therefore an excellent and customised refractive outcome.
